BIO:

Full-stack developer skilled in the MERN stack. Experienced in creating web applications with MongoDB, Express.js, React, and Node.js. Dedicated to building efficient and scalable web solutions.

EXPERIENCE

Red Stag Labs

2024- PRESENT

Fullstack Developer

- Developed the "Know Your Meds" frontend using MUI, React, CKEditor, and Axios, ensuring a responsive and user-friendly interface.
- Enabled doctors to efficiently view patient details, generate prescriptions, and manage patient information.
- Created an intuitive admin interface for seamless appointment scheduling and management.
- Implemented robust live chat functionality to facilitate real-time communication between doctors and patients, and many more features to enhance user interaction and experience.

PROJECTS

GitHub User Tracker:

Developed "githubUserTracker," a React application using FusionCharts for visualizing GitHub user data. Allows users to search and view repositories, forks, stars, and languages used.

Com-fy-Store:

Created "com-fy-store," an innovative e-commerce platform crafted with React, Tailwind CSS, Axios, Daisy UI, and Auth0. Empowering users with intuitive navigation, responsive design, and robust security features for a seamless shopping experience.

H.B Beausite

Launched "hb-beausite," a dynamic travel website now live on Google and hosted on Hostinger. Designed to inspire wanderlust with stunning visuals, intuitive navigation, and seamless user experience, offering travelers a gateway to explore destinations with ease.
