💼 Experience

Red Stag Labs

Current

- **Position:** Frontend Developer.

Responsibilities and Achievements:

- Working on DocApp, a platform where doctors and patients can interact and discuss health issues.
- Converted design mockups into responsive web applications, ensuring optimal performance on all devices and screen sizes.
- Utilized Axios for API integration and testing, ensuring robust and reliable data interactions.
- Collaborated with teams using GitHub for version control, Slack for communication, and Jira for project management.

2023 - 2023

National I.T Solutions.

- **Position:** Frontend Developer.

Responsibilities and Achievements:

- Developed engaging interfaces for tour and travel sites, prioritizing visual appeal and cross-device functionality.
- Managed UI for a school ERP system, collaborating with stakeholders to ensure an intuitive interface for administrators, teachers, students, and parents.
- Seamlessly combined UI and UX principles, prioritizing user feedback and usability testing for enhanced overall experiences.
- Translated design mockups into responsive web applications, optimizing performance across devices and screen sizes.

📖 Projects

E-Renting :-

"E-Renting System" is a web app for online room rentals, offering an efficient, user-friendly interface for booking and management.

TheKashmiriTexi:-

Developed a website for Driver's Union Tourist Taxi Stand No. 20 (Regd. by J&K Govt. with regd. no. 1068), showcasing authentic travel experiences in Kashmir. The site highlights seasoned drivers, modern taxis, and curated adventures, offering transparent pricing and 24/7 support. It provides detailed information on attractions, ensuring seamless exploration and memorable journeys.

FreshAndFineHolidays:-

Created a website for Fresh and Fine Holidays Tourism, highlighting luxury travel experiences. The site features boutique hotels, eco-friendly resorts, culinary journeys, and various adventures, blending relaxation, adventure, and cultural enrichment.
